

Featuring a keynote
presentation from lead
author Andy Isaacs!

Chicago User Conference 2013

Join us for in-depth training, big ideas, and networking

Whether you're familiar with Everyday Mathematics or new to it, we've got the big ideas you need to make a big impact in the classroom. Our regional training sessions will help you learn how to make the most of this dynamic program—while meeting new people and enjoying refreshments and door prizes, too.

July 22nd - 23rd

8:30 am – 4:00 pm

Intercontinental Chicago Magnificent Mile
505 N. Michigan Ave • Chicago, IL • 60611

Cost: \$250

Choose your sessions:

Core Courses

These courses are 1 ½ day sessions offered all day Monday, July 22nd and Tuesday morning, July 23rd. You will complete your training with one of the electives below.

NEW USERS! Initial Training PLUS

Learn to effectively implement Everyday Mathematics for the first time!

Leadership Training

Enhance your understanding of Everyday Mathematics as an administrator or mentor/coach to ensure implementation success.

Elective Sessions

Each session is approximately 3 hours in length. These sessions are offered on the mornings and afternoons of Monday, July 22nd and Tuesday, July 23rd.

Experienced Users may select 4 elective sessions!

Differentiation in Everyday Mathematics

Explore the abundant opportunities to differentiate instruction to meet the needs of all students, including Special Needs, through Everyday Mathematics.

Refining Assessment: Taking a Closer Look

Deepen understanding of Everyday Mathematics and assessment opportunities offered in every grade.

Let's Play! Building Fact Fluency through Strategies and Games

Explore the abundance of opportunity to achieve fact fluency and improve problem solving skills found in Everyday Mathematics games and routines.

Everyday Mathematics Technology in the Classroom

Explore the effective use of technology in the classroom through the Everyday Mathematics Deluxe eSuite components.

Everyday Mathematics and the CCSS Mathematical Practices

Deepen your understanding of how the Common Core State Standards Mathematical Practices are implemented in the Everyday Mathematics program
